

Matemáticas de segundo grado

Tema: Resolviendo Problemas con palabras hasta 20

Estándares que serán cubiertos: Representar y resolver problemas involucrando sumas y restas. Usar sumas y restas hasta 20 para resolver problemas con palabras con situaciones de sumarle, restarle, juntar, separar, y comparar, con números desconocidos en varias situaciones, por ejemplo: usando objetos, dibujos, y ecuaciones con un símbolo en lugar del número desconocido para representar el problema.

CCSS.MATH.CONTENT.1.OA.A.1

Use the rest of this space for pictures

Exercise 1

Here include the first exercise for students. Ensure it is simple, possibly a review of skills they should have mastered.

Include a picture too.

Exercise 2

Here is the next exercise for students. Include a picture.

Exercise 3

Another exercise with pictures.

Exercise 4

Another exercise with pictures.

Exercise 5

Another exercise with pictures.

Exercise 6

Another exercise with pictures.

Exercise 7

Another exercise with pictures.

Exercise 8

Another exercise with pictures.

Exercise 9

Another exercise with pictures.

Exercise 10

Another exercise with pictures.

Exercise 11

Now problems will be one per page. Make them more challenging and ensure students will think about the problem before solving it. Include a picture.

Exercise 12

Problems should be more challenging. Include a picture.

Exercise 13

Problems should be more challenging. Include a picture.

Exercise 14

Problems should be more challenging. Include a picture.

Exercise 15

This is the final problem. Ensure it challenges students and possibly hints at the next standard to be covered. Include a picture.

Reflection:

What did you learn from these problems? _____

_____.

What did you do well at? _____

_____.

What could you improve on? _____

_____.
