System-Wide Tech Webinars

# Creating & Maintaining Classroom Community During Distance Learning

*Open to all K-12 teachers, UC staff/faculty,  
CalTeach students and preservice teachers*

**AUG 20 • 6:15 PM TO 7:30 PM**

The classroom community is the basis for a successful learning experience. When students self-monitor behavior through the development of shared norms and expectations, the classroom becomes a community of learners. In this webinar learn effective strategies and practices to develop your classroom community in the online environment. Many of these tools will be effective strategies when we return to face-to-face instruction and will support the transition between learning environments.

**Presented by: Adrienne Nau**

---

Adrienne Nau has been in education for over 20 year, teaching middle school science before transitioning to a District STEM coach and eventually running the successful Merced City School District STEAM Center. In her current role, Adrienne is the new Science Coordinator for the Merced County Office of Education. Adrienne also a lecturer for the UC Merced CalTeach program.
