https://commerce.cashnet.com/UCME251_W1

SUMMARY OF WORKSHOP

Students will know the basic needs of plants and fish and their relationship to one another.

Students will engineer, assemble, maintain, and observe a small scale aquaponics system that meets plants and fish needs.

MEET THE INSTRUCTOR

I am a third year Cognitive Science Major. I usually spend my days hanging out with my dog. I am excited to teach this workshop all about aquaponics! Come and join me to learn all about this topic!
