**CALLING ALL UC MERCED
POST-DOCS, GRADUATE
STUDENTS, RESEARCH
SCIENTISTS, FACULTY, AND
STAFF!**

2020 BOBCAT SUMMER STEM
ACADEMY **VIRTUAL EDITION**

What is Bobcat Summer STEM Academy Virtual Edition?

The goal of the academy is to provide educational activities that help spark our participant's curiosity for STEM disciplines. This virtual platform will also allow post-docs, graduate students, research scientists, faculty and staff to participate in virtual outreach about the amazing research happening at UC Merced.

What/Who are we looking for?

We are calling our UC Merced post-docs, graduate, research scientists, faculty, and staff to showcase their STEM research and activities in a **one-hour** webinar format for any K-12 grade level (for students or teacher) participants for the summer.

Some ideas for your webinar session can include:

- Hands-on science, engineering, computing, and math activities using everyday home items
- A session to showcase your research at UC Merced
- Research journal club (participants can discuss a research finding or article)

I am interested! How can I be a part of this?

Interested leaders can fill out this online form:

<https://forms.gle/efmS8vkcpgcCBF98>

*The CalTeach at UC Merced staff will reach out for information on getting you set-up for your webinar session after you fill out the form.
